YT660

Now the snow falls where you want it to!

Every Yamaha machine, from motorcycle to outboard to snowmobile, is designed and engineered to make your life more relaxing and enjoyable - and in the case of our snow throwers, to turn a chore into a pleasure! For over 30 years, we've been meeting the needs of consumers and professionals by constantly introducing the very latest technologies and innovative features into our line-up.

Now, our snow throwers will cut you wider paths, throw your snow further and more accurately - and do it with a smooth, quiet easy-going efficiency that will surprise and delight you.

So when the snow comes, Yamaha is there to help you move it to where you want it.

- Kraftig, 4-takts Yamaha-motor og elektronisk starter
- Hydrostatisk transmission - en fornøjelse at køre
- Kraftig 2-trins blæser - kaster sneen 14 meter ud!
- Bred (61 cm) snerydningskapacitet
- Robuste gummilarvefødder - fantastisk vejgreb og trækkraft
- Nem betjening af den drejelige sliske - elektrisk drevet
- 2-trins sliske - plastforing, der reducerer ophobningen af sne
- Kraftig, 2-trins stålsnegl - til hårde opgaver
- 3-trins, gasdrevet højdereguleringssystem til sneglen
- Justerbar "Snow Jaw"-sneskraber
- Kraftig sneglegearkasse - til lang tids brug
- Praktisk arbejdslys på betjeningspanelet - en lys idé!

- New shear bolts guard mechanism (only 2023 models)

YAMAHA
Revs Your Heart

YT660

Now the snow falls where you want it to!

While its mighty 61cm clearing width and huge 14-metre throw will probably tempt you, it'll be the quietly powerful Yamaha 4-stroke engine, serrated dual-stage auger, two-step chute and Hydrostatic Transmission (HST) that will complete the picture and win you over.

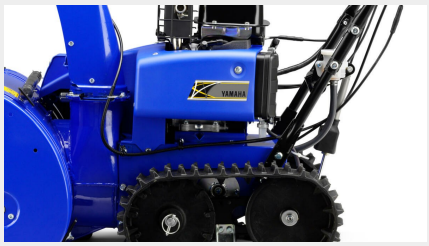
Controlling the HST with its single lever is easy, so you can adjust speed precisely and gradually in Forward or Reverse, while the rubber track drive delivers great grip and traction.

This high perfomer breaks through even icy, hard-packed snow and has an electrically controlled two-stage chute with a 230° turning radius. So no matter what winter throws at you, throw it right back with the remarkable YT660.

YT660

Yamaha 4-Stroke OHV engine with electric start

With the YT660 you can simply turn the key, relax and enjoy the smooth, quiet, reassuring power of the efficient and reliable Yamaha 4-stroke OHV engine This durable, well proven 175cc air cooled unit provides plenty of torque and snow-throwing power, but also delivers excellent fuel economy, running on regular fuel (OCT95).

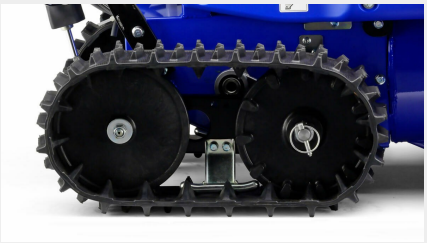


Hydrostatic Transmission (HST)

Our durable hydrostatic transmission system offers more precise speed control as well as smoother shifts between Forward and Reverse - with the use of a single lever. So you can change speed or stop without disengaging the tracks or affecting the speed of the impeller - or the remarkable distance (up to 15 metres) you are throwing that snow!

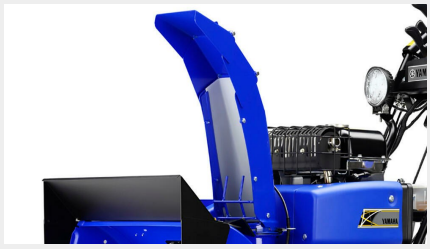
Powerful dual-stage auger/impeller system

The dual-stage auger/impeller system is designed to withstand the harshest winter conditions. The heavy-duty steel auger cuts a very wide path (61cm) and has a serrated cutting edge that breaks up even icy, hard-packed snow - ready for the high-speed impeller to propel it through the 2-step chute and throw it up to 15 metres away.



Tough rubber track drive system

No slipping, no sliding - just great control. The rubber tracks are pliable, with large cleats for added grip when manoeuvring in difficult conditions. They provide good traction, even on steep driveways - and you can even expect this machine to climb steps when necessary. The system works in perfect harmony with the Hydrostatic Transmission.



Plastic-lined chute and easy-to-use controls

The 2-step chute has a plastic liner which prevents the build-up of wet snow and also reduces noise and wear. Rotation is electric-powered, with angle adjustment by a single lever. The interlock lever for auger and drive engagement is a one-handed operation too, leaving the other free to adjust speed or chute position on the fly.

Gas-assisted auger tilt system

The tough, 2-stage steel auger - with its aggressive serrated edge and 'Shock Protector' - also has a 3-position, gas-assisted tilt system, including a very helpful 'float' setting that allows the machine to adapt to the snow conditions by following the ground contours. Adjustment is simple and quick, using a single lever on the control bar.

YT660

Motor	
Motortype	1-cylindret;4-takts;Luftkølet;OHV
Slagvolumen	171cc
Model	MZ175E
Maks. effekt	4.4kw(6.0ps)
Startersystem	Electric 12VDC battery type (std);Manual rekyl (med automatisk dekompressor)
Tændingssystem	TCI

Affjedring	
Clearing width	615 mm
Housing height	440 mm
Snow clearing capacity	35tons/hr
Maximum snow throwing distance	14m

Mål/dimensioner	
Transmissionssystem	Hydrostatic
Ground speed forward	0 - 3.2km/t
Ground speed reverse	0 - 2.4km/t

detaljer	
Diameter	310 mm

Chute control	
Turning radius	220°

Dimensioner	
Tankkapacitet	4.5liter
Engine oil capacity	0.6liter
Køreklar vægt (med fuld olie- og benzintank)	102kg
Samlet længde x bredde x højde	1,476mm x637mm x 1,108mm
