

Sporting DNA

With its compact, sleek design, the agile JogR is easy and fun to ride. But it's the sporty touches – telling you that it's a Yamaha – that really make the scooter stand out. The two big air scoops on the side are a big part of its character.

As a Yamaha model, it's obvious where the sporty touches come from – our knowledge of what works on the racetrack. This is built into the JogR's DNA. Sharp handling and an asymmetric, lightweight frame are allied with the air-cooled 50cc 2-stroke engine, responsive suspension and confidence-inducing disc brakes.

With slimline bodywork and eye-catching graphics, the JogR is stylish, practical and fun.

- Ultra lightweight 50cc sports scooter
- Rigid asymmetric frame for agile handling
- Free-revving air-cooled 2-stroke 50cc engine
- 12inch aluminium 6-spoke wheels
- Stylish analogue/digital instruments
- Front disc brake and rear drum brake
- Under-seat helmet storage and luggage hook
- Slimline bodywork with bold graphics

Minimum effort, maximum fun

Set your imagination free: the JogR takes the effort out of riding but keeps all the fun. It's lightweight, but still strong enough to handle the city. And it is speedy, with enough agility to beat the traffic.

The JogR is also about being noticed. Big air scoops aren't just practical, they make a statement too. Extra grip? There are big 12inch aluminium wheels and wide tyres, equipped with disc and drum brakes to give you the braking power to stop fast.

Everything is designed to help you enjoy your ride, from distinctive graphics that get you noticed, to the kind of practical storage features that you might not think about: but you'll appreciate them once you have them.

12inch 6-spoke aluminium wheels

The JogR's lightweight 12inch diameter alloy wheels offer sporty handling and light steering, making quick directional changes easy. With a sleek 6-spoke design, they run with wide front and rear tyres, for strong road-holding and excellent feel. Telescopic front forks and a high-spec rear shock let the JogR glide over bumps in the road.

Large-diameter front disc brake

The combination of a large-diameter front disc brake (190 mm) and rear drum brake work together to provide strong and effective stopping power – giving you high levels of control even when stopping fast in those busy city streets.

Light and strong chassis

The secret to the JogR's zippy performance and agile handling is its rigid but lightweight chassis. By using a special asymmetric frame design, Yamaha's engineers have succeeded in creating a strong yet light frame, which helps keep overall weight at only a remarkably low 81 kg.

Aerodynamic bodywork and bold graphics

For maximum street presence the JogR is equipped with compact, aerodynamic bodywork – the front section houses a beautifully designed headlight with integral flashers. Lateral air scoops create a sporty look and also provide vital engine cooling. And with superb paint finish and bold graphics, the JogR gets noticed wherever it goes.

Storage compartment and luggage hook

Underneath the contoured sports seat you'll find an easily accessible storage compartment that's designed to accommodate one full-face helmet with ease. And for added convenience, there's also a handy luggage hook.

Analogue/digital instrumentation

The JogR's compact and sleek instrument console displays all the information you need in an easy-to-read way. Featuring a clearly-marked analogue speedometer and a range of digital displays, this attractive console perfectly matches the JogR's lightweight and sporty character.

Engine

Engine type	Single cylinder; Air-cooled; 2-stroke
Displacement	49.0cc
Bore x stroke	40.0 mm x 39.2 mm
Compression ratio	11.6 : 1
Maximum power	2.0 kW @ 7,000 rpm
Maximum Torque	2.46 Nm @ 7,000 rpm
Lubrication system	Separate lubrication
Fuel system	Gurtner PY12
Ignition system	CDI
Starter system	Electric and kick
Transmission system	V-Belt Automatic

Chassis

Front suspension system	Telescopic fork
Front travel	70 mm
Rear suspension system	Unit Swing
Rear Travel	60 mm
Front brake	Single Disc, Ø190 mm
Rear brake	Drum, Ø110 mm
Front tyre	110/70-12
Rear tyre	120/70-12

Dimensions

Overall length	1,740 mm
Overall width	675 mm
Overall height	1,065 mm
Seat height	770 mm
Wheelbase	1,210 mm
Minimum ground clearance	132 mm
Wet Weight	81kg
Fuel tank capacity	5.5litres
