

Finnmaster 55SC

Finnmaster - made in the midnight sun

Welcome to the country of the midnight sun. Here, Finland's proudest boat-builders live and work under a magical summer sky painted in the most beautiful colours.

Every boat that leaves the boatyard is built and designed with decades of knowledge, experience and with a clear vision; we build the safest boats with the smartest solution – without compromising on modern design.

Our boats are tested in a real marine environment, in the archipelago outside our boatyard. Our professional pride knows no limits and we are eager to check the quality down to the smallest detail. We do not make any compromises when we build a boat for you and your family.

- Soft-riding hull
- Easy control and handling
- Practical cockpit
- Large steering console
- Easy access
- Comfortable cushions
- Smart storage

Finnmaster 55SC

The 55 SC. A great all-round performer.

The 55 SC has enough features and advantages to make it a superb leisure boat, but those same attributes also give it the great performance it delivers as a transport boat and family run-about. On-board access is easy, with steps at both the bow and stern - as well as on the sides.

One of this model's most popular features is the large steering console, which offers full visibility while you and your passengers sit comfortably protected from the wind and spray.

The smart fender holder in the bow means the fenders can be swiftly stowed as soon as you have cast off. What's more, when you open one of the hatches under the seating, the cushions remain conveniently in place.

Finnmaster 55SC

Comfortable soft-riding hull design

Ride comfort is a vitally important factor in any successful boat design, so all our hulls are expertly crafted to master the water and deliver a soft, secure-feeling ride for driver and passengers alike - whatever the sea conditions.

Precise handling and control

Handling is an area that gets special attention from our designers, which is why Finnmaster boats are renowned for their user-friendly characteristics and easy manoeuverability. We also test our boats with a range of Yamaha engine power options to ensure that whatever level you choose, your boat responds in just the way you expect. Every time.

Large steering console

The large helm console gives you great visibility but protects you - and your passengers - from wind and spray, even at high speeds.

Smart storage

This model is designed for having fun out on the water, so there's practical storage space to stash the things you'll need for a trip, both in the bow and under the stern seating. What's more, when you open one of the hatches under the seating, the cushions remain conveniently in place.

Easy access

Our aim is always to keep you safe and secure, so you can relax and enjoy your boating. That's why we fitted the 55 SC with conveniently placed bow, stern and side steps to make boarding and access easier for all the family.

Convenient fender holder

The neat fender holder in the bow means the fenders can be swiftly stowed as soon as you have cast off.
