

Finnmaster - made in the midnight sun

Welcome to the country of the midnight sun. Here, Finland's proudest boat-builders live and work under a magical summer sky painted in the most beautiful colours.

Every boat that leaves the boatyard is built and designed with decades of knowledge, experience and with a clear vision; we build the safest boats with the smartest solution – without compromising on modern design.

Our boats are tested in a real marine environment, in the archipelago outside our boatyard. Our professional pride knows no limits and we are eager to check the quality down to the smallest detail. We do not make any compromises when we build a boat for you and your family.

- Tough, soft-riding hull
- Light and precise hydraulic steering
- Easy control and handling
- Spacious and practical layout
- Stylish and timeless design
- Easy access and high freeboard
- Lots of well planned storage space
- Comfortable offshore seats
- Practical boarding steps
- Fender baskets, fenders and covers
- Cool black graphics scheme (option)

Finnmaster - made in the midnight sun

The R6 is ideally suited to whisking you off to your leisure home, to taking you fishing or exploring - or, thanks to its impressive storage space, simply to serving as a fast, agile transporter. With its sharp seaworthiness and stable hull, this tough, stylish boat can extend the season by several months.

The practical boarding steps, high freeboard, open foredeck and high windscreen will tempt the whole family to get on board for new adventures.

Together with smart storage inside the console, super-comfortable seats and an aluminium deck that's as practical as it is easy to maintain, you have an aluminium boat which can meet any boating challenge – great or small.

Finnmaster Husky R6

Comfortable soft-riding hull design

Ride comfort is a vitally important factor in any successful boat design, so all our hulls are expertly crafted to master the water and deliver a soft, secure-feeling ride for driver and passengers alike - whatever the sea conditions.

Precise handling and control

Handling is an area that gets special attention from our designers, which is why Finnmaster boats are renowned for their user-friendly characteristics and easy manoeuvrability. We also test our boats with a range of Yamaha engine power options to ensure that whatever level you choose, your boat responds in just the way you expect. Every time.

Hydraulic steering system

The driver will appreciate the lightness and smooth precision of the Baystar hydraulic steering system. This standard feature adds even greater control and handling.

Comfortable trips guaranteed

The sturdy, comfortable offshore seats - and the sofa-style seat at the stern - are all well protected from wind and spray by the tough, wrap-round glass windshield. So everyone rides in comfort and style.

Smart storage

This model is designed for having fun out on the water, so there's practical storage space to stash the things you'll need for the trip, both in the bow and under the stern seating. What's more, when you open one of the gas-strut hatch lids under the seating, the cushions remain conveniently in place.

Easy access

Our aim is always to keep you safe and secure, so you can relax and enjoy your boating. That's why we fitted the R6 with conveniently placed steps and handrails to make boarding and access - from the stern or bow - easier for all the family. The walk-through gate/window from the aft to the foredeck is another great feature of this layout.

Boat specifications
