

Finnmaster - made in the midnight sun

Welcome to the country of the midnight sun. Here, Finland's proudest boat-builders live and work under a magical summer sky painted in the most beautiful colours.

Every boat that leaves the boatyard is built and designed with decades of knowledge, experience and with a clear vision; we build the safest boats with the smartest solution – without compromising on modern design.

Our boats are tested in a real marine environment, in the archipelago outside our boatyard. Our professional pride knows no limits and we are eager to check the quality down to the smallest detail. We do not make any compromises when we build a boat for you and your family.

- Streamlined, soft-riding hull
- Easy control and sporty handling
- Innovative iPad holder at helm
- Large practical cockpit
- Wide, protective windshield
- Comfortable offshore seats
- Easy access and high freeboard
- Spacious cabin with seawater toilet
- Plenty of practical storage
- Powered table pedestal (option)
- LED docking lights (option)

T8. Choose it when you want the very best

At Finnmaster, we are very proud of our award-winning T8. It combines many unique driving features, our most advanced Smart Design solutions and quite simply the best materials from around the world. We don't feel you should need to compromise and with the T8 you don't, because it's stylish, sporty and exciting, yet comfortable and luxurious - all at the same time.

This versatile day cruiser lets you go from an exciting day out to a fun meal with the family - to rapidly and easily transforming the dining area into a relaxing sundeck.

When the sun finally sets, the family can spend a comfortable night in the spacious cabin, which is equipped with a separate toilet unit.

Comfortable soft-riding hull design

Ride comfort is a vitally important factor in any successful boat design, so all our hulls are expertly crafted to master the water and deliver a soft, secure-feeling ride for driver and passengers alike - whatever the sea conditions. The T8 has a high freeboard and features our latest state-of-the-art streamlined hull design.

Precise handling and control

Handling is an area that gets special attention from our designers, which is why Finnmaster boats are renowned for their user-friendly characteristics and easy manoeuvrability. We also test our boats with a range of Yamaha engine power options to ensure that whatever level you choose, your boat responds in just the way you expect. Every time.

Sturdy glass windshield with innovative dashboard

The large wrap-around glass windshield not only gives you great visibility but protects you - and your passengers - from wind and spray, even in the stern seat. For the driver, the innovative helm design not only has space for a 12" chart plotter but we've also included a special iPad holder option.

Comfortable and spacious cockpit

The U-shaped seating at the stern and the sturdy, swivel-base offshore seats together with the table make the cockpit a very social and comfortable place for up to 10 people.

Convenient sundeck option

With a press of a button you can turn the cockpit table into a comfortable sundeck.

Bright and airy cabin

With its large overhead skylight and long, ventilated portlights with opening sections, the bow cabin is very light-filled and airy. It features two twin berths and a sofa seat - not to mention a seawater toilet and wash basin.
