Buster Cabin

Buster - Boats that are built to last

Our design has always been guided by uncompromising goals regarding ruggedness, everyday practicality and seaworthiness. These values, combined with generations of industrial, hand crafted traditions have created a quality level that already carries a legacy of its own: Buster.

Of over 125.000 boats that we have launched over the past 6 decades, the majority is still in use. The exceptional durability and longevity of a Buster is beneficial to owner and environment alike.

AHT – Aluminium Hull Technology by Buster is living proof of the experience and relentless work spanning 60 years that we have committed to in order to make our boats ever better.

- Provides a warm experience regardless of weather
- Buster Q 16" as standard
- Very seaworthy boat, developed for professionals
- Very silent ride due to advanced sound dampening
- Fixed, 160L aluminium fuel tank
- Bracket adds buoyancy aft and improves handling
- Aft canvas gives more cargo space under cover
- Tilt steering as standard
- Double battery system reduces strain on starter
- Overnighting capability

Commuting boat with overnighting option

The standing room interior is designed to be pleasant and airy. The glass roof and panorama views give excellent visibility in all directions. Noise insulation has also been further improved, as the Buster Cabin is the least noisy boat in the range.

With fall fishing expeditions in mind, the on deck lighting is planned with reduced light conditions in mind. When night falls, the driver's and co-driver's seats fold down to combine with the aft seats, creating two comfortable, full length berths.

The Buster Cabin is an all-weather commuter that is comfortable even in rough weather. The seagoing hull with its deep V section and thick, 5 mm bottom plate has been proven by various authorities in Northern Europe. Due to the optimized aluminium hull, the Cabin is a stable, all weather companion.

Buster Cabin

Comfortable cabin

The interior is designed to be pleasant and airy. The glass roof and panorama views give excellent visibility in all directions. With top notch noise insulation, the Buster Cabin is one of the most comfortable cabin boats on the market.

Big open aft area

Big open aft area is suitable for transporting goods or perfect for fishing
