

Ride the EXcitement!

Jump on board and feel the dynamic thrill of this machine! EX Sport is made to let you taste the adrenaline you seek without compromising Yamaha's world-leading reputation for reliability and attention to detail earned over many years.

Our WaveRunners are built with the pure Yamaha DNA of quality, technological innovation and passion to excite. From the revolutionary RiDE system and lightweight NanoXcel2® hulls, to our exclusive electronic control systems, to the top of the range supercharged, four-stroke 1812cc engine in our most powerful model. Your smile is what we work for.

Advanced design and sheer build quality add even more to the package, so the result is guaranteed excellent performance and thrill, together with the all-important rider comfort!

- Clear and informative multi-function LED meters
- Speedo, Tacho and Fuel level and Hours Run
- Glove Box, plus in-bow and under-seat storage
- Large 50-L fuel capacity - so the fun lasts longer
- Mechanical Reverse for easy manoeuvrability
- Compact, high-pressure Axial Flowjet pump
- Comfortable seating for up to 3 people
- Dual mirrors, re-boarding step and handle
- Yamaha TR-1 - a powerful 3-cyl 1049cc engine

Ride the EXcitement!

Want to explore the “sports” in watersports? Jump on board and feel the dynamic thrill of this machine. First timers? Don’t back out on your passion. The EX Sport is, of course, fully equipped with the agility and user-friendly handling you would expect from your Yamaha.

The EX Series has been designed with all the reliability and technical innovation for which our WaveRunners are widely known. But we are Yamaha, we are here to rev hearts and this Sport variation of the series will let you taste the adrenaline you seek.

Naturally, it also has our famously smooth, quiet power and economy, plus everything needed to get you on the water in style, including clear informative instrumentation, mechanical reverse, dual mirrors, re-boarding step and handle, a tow hook and generous storage.

Powerful Yamaha TR-1 – 1049cc three-cylinder engine

Despite its surprising affordability, the exciting EX Sport is powered by the latest version of our innovative three-cylinder engine, the 1049cc Yamaha TR-1. It's a compact, lightweight unit that packs real punch, with lively acceleration and great top-end power, plus the legendary economy and reliability you expect from a Yamaha.

Designed for all-round handling and performance

The smooth, quiet power, compact dimensions and low weight of the TR-1 engine, matched with the tough, durable and well-proven hull design, deliver a great mix of user-friendly handling, agility and balance. It has a mechanical reverse too, so it all adds up to maximum fun and control, even for less experienced drivers.

Axial Flow jet pump – all the pressure you need

Exhilarating handling and exciting performance have long been hallmarks of the Yamaha WaveRunner. The instant "bite" on the water and acceleration are made possible by a combination of a high-flow intake, axial flow jet pump and a stainless steel impeller, which runs within a precision-engineered housing.

Comfortable seating for up to three people

The ergonomically designed, precision-made seat is a very secure and comfortable place to be – perfect for solo riding or cruising with up to three people. The unusually high comfort level will make it feel like it's been custom-made to fit you. What's more, there's a very handy dry storage area underneath it.

Multi-function LCD instruments

Great-looking, multi-function LCD instruments mounted in a stylish cockpit panel are not something you may expect on such a keenly priced, affordable watercraft, but you'll find them on the EX Sport. It offers clear, easy-to-read Speedometer and Tachometer displays, as well as informative readouts of Fuel Level and Hours Run.

Bow storage

Quick access to on-the-water essentials in the bow storage.

Engine

Engine type	3-cylinder; TR-1; 4-stroke; DOHC; 4-valves
Supercharger	-
Displacement	1,049cc
Bore x stroke	82.0 mm x 66.2 mm
Compression ratio	11.0 : 1
Pump type	144 mm Axial Flow
Fuel	Unleaded Regular Gasoline
Fuel supply system	Electronic Fuel Injection
Fuel capacity	50.0litres
Oil capacity	3.5litres

Dimensions

Length	3.14 m
Width	1.13 m
Height	1.15 m
Dry weight	265kg

Features

Storage capacity	29.0litres
Rider capacity	1-3 person
