- Powerful TR-1 High Output 1049cc three-cylinder engine
- Huge and practical storage with 114 litre capacity
- Large, watertight glovebox and separate phone storage
- Adventurous styling, colour and graphics
- Convenient self-draining footwells
- Easier re-boarding with more comfortable step
- Extended re-mount platform with Hydro-Turf mats

Cruise the waves of fun!

Alone or with company, the VX Cruiser will be that splash of fun you are looking for on the waves! Its in-built sound system will bring the party wherever you go while you fully enjoy the exceptional style, performance and smooth power of this model.

Its brand new features, including re-designed ergonomic three-person seating, a unique, easy-access multi-function colour display system and twin multi-mount connection points for your navigation kit or camera, learner mode and many more, will make the difference.

Versatility has historically been the VX models' most popular characteristic, but don't stop there – discover for yourself why this new Cruiser is so truly impressive, taking you from the excitement of watersports to the relaxing quiet of waterway cruising.

New 4.3" multi-function colour display with fast access

Among its many talents, this clear and easy-to-read display helps you control and monitor all the systems on board, using the fast-access buttons next to the unit. Top speed and acceleration limits can also be entered from here, along with the PIN-activated learning and security settings. We put the latest technology to work for you!

New seat design – more comfort and better handling

Both the super-comfortable, three-person cruiser seat and the handlebar of the VX are new, narrower designs that provide excellent ergonomic sitting and driving positions. Together with the deeper, wider footwells and new-design grips, this gives (especially to the smaller rider) great control over the handling.

Integral audio system takes your tunes on the water

The new VX Cruiser has another special talent: it can turn into a concert hall, thanks to its fully integrated, factory-installed Bluetooth sound system. The speakers are ideally positioned in the footwells and controlled from an easy-access panel close to the handlebar. A low-voltage regulator is fitted to protect the battery.

RiDE system (Reverse with Intuitive Deceleration Electronics)

The revolutionary RiDE system transforms your riding pleasure, bringing a new feeling of confidence to every rider at every level. Simply pull the lever on the right hand-grip to move forward and accelerate. Pull the lever on the left grip to slow down or reverse. Yes, with the bonus of Reverse Traction Control, it really is that simple!

TR-1 High Output 1049cc three-cylinder engine

The VX Cruiser is powered by our innovative three-cylinder engine, the 1049cc High Output TR-1. This remarkably compact and lightweight unit packs a real punch, and offers lively acceleration and great top-end power, plus economy and reliability. The light weight of this engine also helps deliver superior handling, agility and balance.

Huge and practical storage facilities (114 litres)

The latest VX has industry-leading amounts of stowage space, so you can take everything you may need along with you. Not only is there huge under-seat and bow storage, but in addition, the very large, watertight glove box has blue LED accent lighting, USB and 12V outlets and even a handy space to secure and charge your phone.
