- Large, watertight glovebox and separate phone storage
- Adventurous styling, colour and graphics
- Convenient self-draining footwells
- Easier re-boarding with more comfortable step
- Extended re-mount platform with Hydro-Turf mats

Pure power unleashed.

The new VX Cruiser HO is the very top of the VX range with the most powerful engine of the family. 4 cylinders and 1.8L of high output for the purest excitement are combined with exceptional cruising luxury for those for whom compromise is not an option.

Many factors have played a part in making the VX models our most sought-after watercraft, but it is their true versatility that has won such a loyal following, with an impressive performance repertoire that can take you from the adrenaline-pumping excitement of water sports to the relaxing world of waterway cruising.

The new VX Cruiser HO really is the stand-out premium watercraft in this segment, delivering a potent blend of high-performance excitement, precision handling, riding comfort and outright style. For the ultimate cruising experience bet on the VX Cruiser HO.

New 4.3" multi-function colour display with fast access

Among its many talents, this clear and easy-to-read display helps you control and monitor all the systems on board, using the fast-access buttons next to the handle bar. Top speed and acceleration limits can also be entered from here - along with the PIN code-activated learning and security settings. We put the latest technology to work for you!

New seat design - more comfort and better handling

Both the super-comfortable 3-person cruiser seat and the handlebar of the VX are new, narrower designs which provide an excellent ergonomic sitting and driving position. Together with the deeper, wider footwells and new-design grips, this gives (especially to the smaller rider) great control over the handling.

Integral audio system takes your tunes on the water

The new VX Cruiser HO has another special talent – it can turn into a concert hall, thanks to its fully integrated, factory-installed Bluetooth sound system. The speakers are ideally positioned in the footwells and controlled from an easy-access panel next to the handlebar. A low-voltage regulator is fitted to protect the battery.

RiDE system (Reverse with Intuitive Deceleration Electronics)

The revolutionary RiDE system transforms your riding pleasure, bringing a new feeling of confidence to every rider at every level. Simply pull the lever on the right hand-grip to move forward and accelerate – pull the lever on the left grip to slow down or reverse. Yes, with the bonus of Reverse Traction Control, it really is that simple!

Powerful High Output 1812cc 4-cylinder engine

The VX Cruiser HO is powered by our largest capacity waveRunner engine, the innovative 4-cylinder, 1812cc High Output TR-1. This remarkably compact and lightweight unit packs a real punch and offers extraordinary acceleration and great top-end power, but with economy and reliability.

Huge and practical storage facilities (114 Litres)

The latest VX has industry-leading amounts of stowage space, so that you can take everything you might need along with you. Not only is there huge under-seat and bow storage, but in addition, the very large, watertight glove box has blue LED accent lighting, USB and 12V outlets - even a handy space to secure and charge your telephone.

Engine

Engine type	4-stroke; 1.8 Liter High Output; 4-Cylinder
