

Jump on and start the fun!

Being out on the trail or in the powder, for work or play, is one of life's great feelings - creating emotional moments to linger long in the memory - so enjoy our snowmobiles. Each one is designed to deliver world-beating performance, unmatched handling and supreme comfort - with economy and reliability.

These advantages form the winning combination you can depend on from your Yamaha. They come as standard, along with the innovative engineering and electronic control technologies that bring you and your machine close together as a unit – creating a more satisfying riding experience than ever before.

So wherever you ride – on smooth or rough trails, in soft powder or up at high altitudes – choose the perfect partner. Your Yamaha.

- Created to suit riders 8+ yrs and up to 155 cms tall
- Yamaha quality and DNA all through - like Dad's!
- Great riding position - for balance and control
- Smooth quiet engine - Yamaha 200cc 4-stroke OHV
- Electric start system - easy for little people
- Heated hand warmers for having fun in comfort
- Double wishbone front suspension and plastic skis
- Grippy and hard-wearing Camso® Cobra™ track
- Hydraulic disc brake and centrifugal CVT clutch
- Lightweight aluminium tunnel with deep foot wells
- Mikuni CV carburettor for reliable starting

Jump on and start the fun!

Jump on the SnoScoot and enter a world of fun! Packing all the fun of a full-size, full-out snowmobile in a more compact and manageable machine, the SnoScoot provides unbeatable and exhilarating entertainment.

Designed to provide fast, exciting, accessible-to-all adventures for people of younger age (8+) or smaller stature, this remarkable machine is a testament to over 50 years of experience in building the world's most advanced snowmobiles.

Its size and speed apart, the lively, stylish Yamaha SnoScoot, from engine and suspension to handling and features - is a 100% fun-packed snowmobile! After all, a great many Mums and Dads who are keen riders today, enjoyed their first snowmobile discoveries aboard a SnoScoot.

Made to measure for younger or smaller riders

With seat position and ergonomics designed to help keep the rider centered and upright, the balance of the machine is easier to maintain, making for excellent handling and control. The SnoScoot offers brisk performance and a perfect balance between agility and stability that brings both excitement and confidence to newer riders.

Great looks and comfortable riding

The SnoScoot is designed for heading out and having fun - pure and simple. That's why it has such a stylish, striking colour scheme and practical luxuries like deep, secure footwells, wide running boards, a comfortable seat and - so important for getting maximum enjoyment out of a snowmobile ride - electric start and heated hand warmers!

Rear suspension that's pretty serious

Because the advanced chassis design and precise handling is as close to a full-size Yamaha as it's possible to be, the rear suspension also had to be equally capable. For the SnoScoot, we developed a slide-rail suspension system with a steel twin-tube hydraulic shock, as well as an adjustable pre-load torsion spring.

Yamaha quality and DNA through and through

Deliberately modest though the sheer speed performance may be, this is every inch a Yamaha snowmobile, its power train, chassis, suspension, skis and drive systems having been built to the very same high quality and safety standards as our legendary full-size models. So there's no better way to learn to ride - or to enjoy the snow.

Strong, reliable drive and brake systems

Driveability, toughness and durability are vital for a machine with this sort of job to do. So the SnoScoot has a centrifugal CVT clutch mated to a fully enclosed final drive with a special rubber belt - it's a lightweight and almost maintenance-free system. A Hayes hydraulic disc brake on the drive shaft provides the stopping power.

There's a lot going on up front

Climb aboard a SnoScoot and you find snocross-style handlebars, a specially designed steering system, lightweight skis and proper 'grown-up' double wishbone front suspension... this is the fun way for youngsters to hone their skills! The special Yamaha-designed skis have tapered tips to ensure super-precise steering and excellent flotation too.

Engine

Type / Displacement	4 Stroke / 192cc
Cylinders	1-Cylinder
Cooling	air-cooled
Bore x stroke	70.0 mm x 55.0 mm
Intake design	1-valve
Carburation	BS-25 Mikuni CV Carburettor
Ignition system	CDI
Exhaust	1-valve
Disc brake system	Hydraulic disc
Clutch / transmission	CVT

Suspension

Front suspension system	Double Wishbone
Front shocks	Hydraulic Twin Tube
Front travel	114 mm
Rear suspension system	Slide-rail; adjustable torsion spring
Rear shocks	Hydraulic Twin Tube
Rear Travel	216 mm

Measures / Dimensions

Ski stance (ctr. to ctr.)	775 mm
Track Type	Camso® Cobra
Overall height	914 mm
Overall length	2,134 mm
Overall width	914 mm
Fuel tank capacity	8.33 L
Track W x L x H (")	10 " x 93 " x 1,0 "
Track W x L x H (mm)	254 mm x 2,363 mm x 25.4 mm

Features	
Electric start	Electric & Recoil
Reverse	N/A
Hand & thumb warmers	2 position Handwarmer
Headlight watts, type	12V/55W Halogen
DC output	N/A
