

## Enter the MAX family

The XMAX 125 is our ultimate every day urban commuter. Its powerful and economical 125cc 4-stroke engine delivers strong performance with low running costs - and the motorcycle type front forks ensure outstanding comfort.

The Traction Control, disc brakes and ABS give added confidence and stability on slippery road surfaces - while every trip is made easier thanks to the Smart Key keyless ignition. And with its huge illuminated underseat storage, there's space for 2 full-face helmets.

Equipped with a 12V outlet and featuring an adjustable screen and handlebars, the sporty XMAX 125 has everything you need and desire to make every day better.

- Powerful and economical EURO5 Blue Core engine
- Compact MAX-design body with easy ergonomics
- Dual LED headlights & LED tail lights
- Smart Key keyless ignition
- Traction control system (TCS)
- Motorcycle type front forks
- Huge illuminated storage for 2 full-face helmets
- Spacious dual seat with separate rider's backrest
- Tool-adjustable handlebars and 2-position screen
- Stylish instruments with large LCD display
- 12V outlet in front left storage compartment

## Designed to the MAX

At Yamaha we believe that commuting should always be fun. And the XMAX 125 is built to make every trip more enjoyable by giving you the ideal balance of sportiness, practicality and functionality.

Whether you're new to scooters or looking for your next model, you are going to like what you see. The 2021 model is equipped with a new 125cc Blue Core EURO5 compliant. It also features Start & Stop system to further improve fuel economy. Smart Key keyless ignition for simple fuss-free operation - and under the seat there's a huge storage compartment.

Exclusive dual LED headlights and dynamic design underline the XMAX 125's premium quality - and with traction control and ABS as standard, you're in control. Choose the X-MAX 125. Start with the best.

## Sporty, stylish and practical 125cc scooter

Every Yamaha XMAX scooter has been developed using pure and undiluted MAX DNA. So as soon as you jump aboard your new XMAX 125 you'll experience agile handling together with strong acceleration, making this sporty, stylish and practical sports scooter a fast and effective commuter - and your entry into the MAX family.

## Smart Key keyless operation

When you're commuting you want every journey to be as easy and stress free as possible. Which is why we've equipped the XMAX 125 with a Smart Key keyless ignition system. As long as you have the key with you, you can unlock and start your scooter and access the underseat storage without having to physically put the key in the ignition.

## Traction Control System (TCS)

On a typical ride to work you may encounter everything from wet roads through to shiny manhole covers and polished cobblestones - and even mud or dirt near construction sites. Thanks to the XMAX 125's Traction Control System you can now ride with confidence, because it gives you added control by maintaining rear wheel grip on slippery surfaces.

## Huge underseat storage

The XMAX 125 may be one of the sleekest and sportiest scooters in its class - but it's also one of the most practical thanks to the huge underseat storage space! Just flip up the seat and you can store 2 full-face helmets or a laptop and more - and for added convenience a neat box light illuminates the compartment.

## Full LED lighting

Take one look at the face of the XMAX 125 and it's clear to see that this sporty scooter's look is inspired by our high-performance MAX scooters. The angular dual headlights feature full LED lighting that gives a powerful beam and reduces energy consumption - and with front and rear position lights and LED tail lights, the XMAX 125 is ready to see and be seen.

## Motorcycle-type front forks

When you're commuting along the highway you can't see what your suspension is doing, but you'll certainly feel the difference that the motorcycle type forks make on the XMAX 125. With 110mm of travel, they soak up the bumps for a smoother ride - and they're also designed to give you maximum comfort and control during braking and cornering.

## Engine

Engine type	4-stroke; Liquid-cooled; SOHC; 4-valves; Single cylinder
Displacement	124,66cc
Bore x stroke	52.0 X 58.7mm
Compression ratio	11.2 : 1
Maximum power	9.0kW @ 8,000rpm
Maximum Torque	11.0 Nm @ 6,250 rpm
