

Ready for any adventure

Back in the 1980s Yamaha's original ground-breaking Ténéré model made global exploration possible for thousands of riders. Inspired by the same spirit of discovery, the new Ténéré 700 Explore is ready to give a new generation of riders the ability to break out of the daily routine and see what's over the Next Horizon.

What makes the Ténéré 700 Explore so different is its reduced seat height, achieved thanks to the new suspension system. The front forks and rear shock give 20mm less travel resulting in a lower seat height, as well as ensure a comfortable ride even when you're fully loaded with luggage.

- Revised 43mm KYB front forks, 190mm wheel travel
- Remotely adjustable rear shock absorber, 180mm wheel travel
- Lower seat height
- Increased wind protection
- Choice of hard or soft side cases
- Quickshifter with dedicated settings
- 5-inch colour TFT meter with smartphone connectivity
- 690cc, 4-stroke, CP2 engine
- 3-mode switchable ABS
- Ergonomic 16-litre fuel tank

Ténéré 700 Explore

The special touring screen is 50% larger than the standard design, while the connected 5-inch TFT meter keeps you in touch with civilization while you explore unbeaten tracks. Side case stays are fitted as standard so you can easily add Yamaha's Genuine aluminium side cases or soft side bags – and for seamless acceleration this fully-equipped explorer features a dedicated quickshifter.

Ready for any adventure

Since 2019 the Ténéré 700 has made exploration more accessible than ever before. Light, compact and versatile, this machine has quickly established itself as the definitive bike for riders who appreciate its remarkable long distance on road comfort, as well as its outstanding off road performance.

Now the Ténéré 700 Explore is about to make global travel and international exploration even more accessible. Its unique specification perfectly combines comfort with performance, including KYB front forks and rear suspension system with reduced wheel travel, in addition to a higher and wider touring screen for extra wind protection.

Revised suspension settings make the Ténéré 700 Explore even more accessible thanks to a lower seat height, while the side case stays that can accommodate hard and soft luggage from the Genuine Yamaha accessory line make it ideally suited for longer journeys. All you need is a tank full of fuel and the world is yours.

Revised 43mm KYB front forks

For improved convenience and easier ground access the Ténéré 700 Explore is equipped with 43mm KYB front forks offering 190mm wheel travel, 20mm less than the Ténéré 700. The revised spring rates give a stable and comfortable ride when touring with luggage – and the reduction in suspension travel achieves a lower seat height.

Remotely adjustable rear shock absorber

The bike is equipped with a specially developed KYB shock absorber with an increased spring rate that delivers excellent comfort and controllability even when you're fully loaded. Giving 180mm travel – 20mm less than the Ténéré 700 – the remotely adjustable shock gives a lower seat height for easy ground access.

Lower seat height

For easier mounting and dismounting the latest Ténéré 700 Explore is equipped with a lower seat height of 860mm – 15mm less than the Ténéré 700. This offers various advantages, including easier ground access for added low speed controllability when riding in tricky off road situations or in congested traffic.

Increased wind protection

When you're riding long distances you'll appreciate the added wind protection provided by the factory-fitted larger screen. Higher and wider than the standard design, it gives an 50% increase in surface area to ensure improved touring comfort.

Dedicated quickshifter

The unique specification of the Ténéré 700 Explore is focused on delivering added comfort and convenience. The new quickshifter features settings that have been developed specifically for the 690cc CP2 engine. Now you can enjoy seamless upshifts for smoother and more effective acceleration.

Choice of side cases

The Ténéré 700 Explore features side case stays as original equipment, and when you purchase your new bike you can choose to fit* Genuine Yamaha aluminium side cases available in black or silver – or you can go for the Explorer soft bags. *At additional cost.

Engine

Engine type	4-stroke;2-Cylinder;Liquid-cooled;DOHC
Displacement	689cc
