

Your golfers' experience just got an upgrade.

We put the needs of golfers and course owners at the heart of every Yamaha product, and the Drive² AC Li is no exception. Building on the success of the Drive² AC AGM, this model has a lithium-ion battery which, thanks to its 25% lighter weight (only 331kg), allows for higher speeds and reduces wear on turf, tyres and brakes.

We have retained the best-in-class seating, luxury and versatility of the Drive² AC AGM and introduced a Roypow® LFP battery that provides up to eight years of life with zero maintenance, with faster charging. The fully independent front suspension has also been optimised to complement the lightweight lithium-ion battery and deliver a smooth comfortable ride.

The exceptional Drive² AC Li is not just comfortable, powerful and responsive. It offers zero emissions, almost silent operation and is also easy to maintain, making it the efficient and sustainable choice. Don't take our word for it – try it yourself.

- Yamaha developed iron based LFP type Lithium-Ion battery
- Long-lasting, fast-charging, light battery for speed
- Battery is maintenance free for up to eight years (five years warranty)
- Front suspension fully optimised for lightweight battery
- Class-leading 3.3kW AC electric motor
- Sleek body design and stylish colours
- Spacious automotive-style dash with extra storage
- Modular body with best-in-class seating and space
- Virtually silent running with zero emissions
- State-of-the-art regenerative braking

Your golfers' experience just got an upgrade.

Our Drive² AC Li golf car is the first choice for the discerning golfers and course owners. Its sophisticated, powerful 3.3 kW motor and high-performance Roypow® LFP battery provides speed and stamina. Paired with a luxurious, comfortable interior, it delivers an enjoyable ride that makes a statement with style and performance.

An extensive range, fast charging capabilities, battery longevity and reduced maintenance make the Drive² AC Li golf car the ideal choice for demanding, hilly courses where speed, stability and staying power are a must for on-course confidence.

This model pairs a super spacious, comfortable and luxury finished interior, with silky smooth acceleration and relaxingly quiet performance. Not only is this great for golfers, it also guarantees ultimate efficiency for course owners, thanks to its low maintenance needs and zero-emissions factor.

Lithium-ion battery power means long-lasting excellence

With the Drive² AC Li you'll enjoy superior speed across the course, thanks to the iron based LFP type Lithium-Ion battery's lightweight, plus faster charging and greater endurance, ease of handling and a longer battery life of up to 8 years.

Smooth suspension optimised for a luxurious ride

Yamaha's suspension is fully independent at the front, and this advanced design uses automotive-style, coil-over shock struts to minimise roll. The fully independent front suspension has also been optimised to complement the lightweight lithium-ion battery for a smooth ride. The latest Drive² models also benefit from redesigned longer stroke rear suspension for increased comfort.

3.3 kW electric motor

The Drive² AC Li models feature the high-efficiency electric motor, widely acknowledged as the most sophisticated and powerful design in its class. The smooth acceleration powers you up to full speed in an instant and delivers supreme hill-climbing ability, making this whisper quiet, zero-emissions vehicle suitable for every environment.

Larger automotive style dash

The Drive² has been designed with the modern golfer in mind and features an automotive style dashboard with conveniently placed stowage space for drinks and personal items. The storage bin with its non-slip mat is ideal for phones, and the optional USB outlets mean players can ensure their devices are kept charged throughout the day.

Supremely comfortable contoured seats

The industry's largest and most comfortable seats feature deep, supportive contours that help to hold occupants in place while on the move. With their generous legroom and spacious interiors, the Drive² is designed to accommodate users of all heights and sizes, enabling easy access and ensuring that every player enjoys their day to the maximum.

Modular body design – practical and durable

The Drive² has a modular body design that makes it easy to own and maintain, enabling operators to keep down-time to a minimum, for increased efficiency and profitability. A three-part rear panel reduces repair costs and gives easy access to the motor, while the sturdy bumpers and durable body panels are built to ensure optimum strength and durability.

Power supply/Drive train

| | |
|---------------|-------------------------|
| Output rating | 3.3 kW |
| Motor | 48 volt AC Motor |
| Batteries | One Lithium-Ion battery |
