

XSR125

Born for free spirits

You don't have to be a motorcyclist to ride the XSR125. Because this great looking lightweight has been specifically developed for anyone who may be reconsidering the way they live their life. And if – like many people – you're looking at alternative ways to get around, this accessible Yamaha has everything to offer.

With its comfortable riding position, smooth suspension and agile handling, the XSR125 is a joy to ride. Its full-power 11kW 125cc engine is fully EU5+ compliant for use in many restricted city centres*, and features Yamaha's advanced VVA technology for reduced emissions and increased economy. And its pure neo-retro design gives a timeless look and understated appeal.

- Best-in-class 125cc EU5 engine
- Pure and timeless XSR styling
- 37mm USD front forks
- Stylish block pattern tyres
- High-tech LED headlight and taillight
- Strong and light Deltabox frame
- Premium details
- Circular LCD Meter

XSR125

Like every Yamaha, the XSR125 features a premium specification for a first class riding experience – and reliability and build quality are second to none. So if you're a car driver with a B-licence* – or a rider with an A-licence – it's time to join the Faster Sons family and discover a new sense of freedom with the fashionable, affordable and fun new XSR125.

Born for free spirits

The stylish XSR125 has got what it takes to get you there in less time. Its timeless good looks and eye-catching colours stand out wherever you go – and the full-power 125cc 11kW engine and agile handling make every trip into work or college a whole lot more fun than going by crowded public transport.

This is the most accessible bike in Yamaha's Sport Heritage line up – and it comes with a premium specification that includes LED lights just like the larger capacity XSR700 and XSR900 – as well as a lightweight Deltabox frame and USD front forks that give a confident and comfortable ride.

More than anything, the XSR125 is all about becoming part of Yamaha's stylish and unique Faster Sons movement that includes a whole package of clothing and accessories that match your attitude. It's the sure way to having more fun and freedom – and its ready to make things happen for you.

XSR125

Best-in-class 125cc EU5 engine

Delivering a full 11kW – the maximum power allowed in the A1 category – the best-in-class engine is the same as the MT-125 and YZF-R125 design, and features Yamaha's sophisticated Variable Valve Actuation system that ensures optimum power and torque for strong performance and lively acceleration. Fully EURO5-compliant design ensures minimal emissions.

Pure and timeless XSR styling

With its strong horizontal line, the XSR125's pure and timeless Faster Sons styling is influenced by Yamaha's larger capacity XSR700 and XSR900 Sport Heritage models. Combining retro design features such as the rounded fuel tank, long flat seat and circular lights with the very latest engine and chassis technology, the XSR125 pays homage to the past while looking ahead to the future.

37mm USD front forks

Featuring a pure black finish that is coordinated with the frame and wheel colour to emphasize the cool retro style, the 37mm USD front forks give you a smooth and confident ride. Along with the Deltabox frame, 17-inch wheels, 1330mm wheelbase and 815mm seat height, this specification makes the XSR125's adaptable chassis ideally suited to riders of all sizes.

Stylish block pattern tyres

The XSR125's lightweight 10-spoke alloy wheels are fitted with great-looking block pattern tyres that provide plenty of traction. The combination of a 140/70-17 rear tyre and a 110/70-17 front tyre gives a confident and predictable handling feeling, making this agile lightweight one of the best ways to explore the city.

High-tech LED headlight and taillight

The classic-style round headlight and round taillight are perfect examples of how the XSR125 blends retro cool with up to the minute technology. Using substantially less power than conventional lights while giving a much brighter beam, the full LED headlight turns night into day – while the compact LED taillight gives the bike's rear end a clean and pure look.

Strong and light Deltabox frame

What distinguishes Yamaha 125cc models from other bikes in the class is the Deltabox frame. Featuring twin spars that run in a straight line from the steering head to the swingarm pivot for optimum strength, this advanced design provides precise and predictable handling and easy steering for maximum riding confidence.
