

If emotion was an engine...

For some, boating is a pastime. For others, it's how they breathe. This is for the second kind; the ones who see adventure not as a want, but a need. The 80hp turns power into poetry and weekends into memories.

Every note of its design from the smooth intake and clever exhaust to the quiet precision of its micro-computer control is tuned to deliver more than movement. It delivers connection. Between you, your boat and the open water.

Cleaner, kinder and crafted with care, it's proof that power and peace can coexist. So when you turn down the engine and drift in the silence, you'll still feel it; that hum of something extraordinary, just beneath the surface.

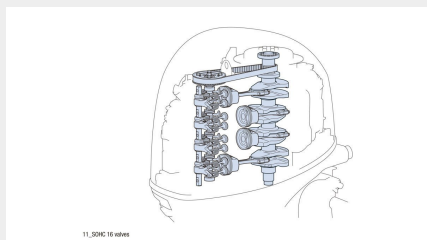

- Sleek design

Feel the power, feel the freedom.

Built to move as one with you, it glides into motion with vivid acceleration and the kind of confidence that makes you feel every journey deep in your soul. Yamaha's refined 4-stroke design delivers clean, consistent power, whether you're chasing the horizon or just drifting with the tide.

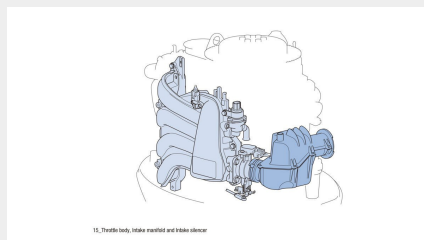

A 16-valve SOHC engine and multi-point EFI work in harmony to make every throttle touch silky smooth. You'll feel it in the way it lifts, responds and settles; more like a dance than a drive. It's control that doesn't shout. It whispers "awesome" in an awed tone.

With PrimeStart™, a high-output alternator and intuitive Digital Network Gauges, you're always in command, even when the water's doing its best to remind you who's boss. It's the kind of reliability that makes you bolder, calmer and more willing to go just one bay further.

16-valve SOHC engine layout

Responsive by design. The SOHC layout with 16 valves delivers crisp acceleration and effortless mid-range, which feels a lot like the boat has suddenly learned good manners.

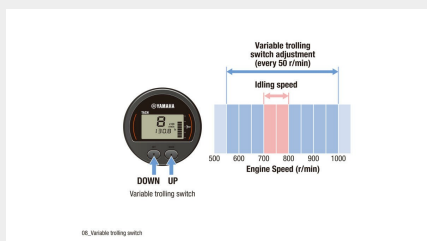

Large single throttle valve

One valve, total composure. Pulse-tuned airflow feeds all four cylinders evenly, so the engine breathes smoothly and your throttle hand feels satisfyingly connected.

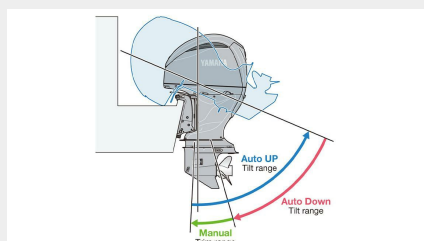

Digital network gauges

Know everything at a glance. Speed, trim, hours, economy, even the subtle stuff you only chat about at the marina. Clear data means calmer choices and smoother days, from breakfast launch to golden-hour glide.

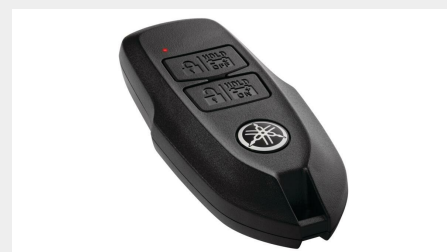

Easy control of engine RPM for trolling

Tap, tap, perfect pace. Adjust revs in 50 RPM steps for unhurried trolling, gentle river work or a stealthy approach to the quayside table you called ahead for.

Wide Range Power Trim & Tilt

From glassy mornings to wind-chopped afternoons, a thumb press sets your angle, sharpens acceleration and pops you onto the plane quickly. Think of it as your comfort dial for both speed and serenity.

Y-COP remote immobiliser with smart key

Your outboard, on your terms. Yamaha Customer Outboard Protection immobilises the engine at the press of a button, adding discreet security without adding hassle. Think car-style convenience, boat-level peace of mind.

Dimensions

Overall length	803 mm
Overall width	488 mm
Steering angle	35 degrees each direction
Overall height	L: 1622 mm, X: 1749 mm
Engine transom height	L: 516 mm, X: 643 mm
Dry weight	162 kg - 166 kg

Engine

Ignition / advance system	TCI
Engine oil capacity	3.2 L / 3.0 L (with / without oil filter replacement)
Compression ratio	10.0 : 1
Alternator	35 A (battery charging: 21 A)
Lubrication system	Wet sump
Bore x stroke	81.0 × 88.9 mm
Engine type	16-Valve, SOHC, In-line 4 cylinders
Displacement	1832 cm ³
Fuel induction system	Fuel injection
