

More go, less "whoa."

This is power you can trust. Smooth starts, quiet cruising and the uncanny ability to turn even novice skippers into landing legends. And if you fall off your wakeboard, that's on you, not the engine!

It's light enough to lift without the "old person" grunts, tough enough to handle the surprises and refined enough to make you look like you've done this before.

From sunrise casts to sunset toasts, it's the small engine that brings big-day energy. Always ready, always steady, always just a little cooler than an engine this size deserves to be.

- Sleek design

Compact power, big personality.

Designed to feel effortless from the first pull, it glides into life like it's been waiting for you. Yamaha's famous 4-stroke smoothness keeps things calm and quiet, so you can actually hear your passengers chat over the sound of the water.

Power comes easy, control comes naturally. Twist the throttle and feel that satisfying surge forwards; steady, confident and just lively enough to make you grin. It's all the thrill without the stress; boating as it should be.

Whether it's your fishing companion, your family ferry or your secret escape plan, this engine makes the journey as rewarding as the destination. Portable, practical and playful enough to make you want to go again tomorrow.

Smart engine design

Power that feels smooth, not shouty. The intelligent twin-cylinder design delivers all the muscle you need, with the refinement you didn't know you could have. It's proof that quiet confidence travels fast.

Advanced tiller handle design and controls

Easy comfort, clever control. The ergonomic handle sits exactly where you want it, so you steer, shift and smile all at once. Effortless handling means more time looking ahead and less time pretending you're not wrestling with the throttle.

True portability

Every trip starts with a lift, so we made it a pleasure. A solid carry-handle and fold-back tiller make stowing it simple and stepping aboard smoother. Because your day on the water should start with excitement, not heavy lifting.

Rest pad for vertical storage position

Compact by design, considerate by nature. Whether it's upright on deck or tucked neatly in the garage, the special rest-pad and folding tiller make storage effortless. Perfect for keeping life (and the boat) clutter-free.

Fresh water flushing system

A quick rinse, a longer life. Simply connect a hose and let the clean water do its thing; no running the engine, no drama, no corrosion. It's like giving your outboard a spa day after a salty adventure.

Shallow water drive system

Close calls welcome. Cruise right up to the shallows without a second thought — this system protects your propeller so that you can chase the best lunch spots or hidden picnic coves without flinching at the depth sounder.

Dimensions

Overall length	MH: 983 mm, E: 557 mm
Overall width	MH: 357 mm, E: 333 mm
Steering angle	43 degrees each direction
Overall height	S: 1008 mm, L: 1135 mm
Engine transom height	S: 431 mm, L: 558 mm
Dry weight	40 kg - 45 kg

Engine

Ignition / advance system	CDI
Engine oil capacity	0.8 L
Compression ratio	9.4 : 1
Alternator	6 A
Lubrication system	Wet sump
Bore x stroke	56.0 × 43.0 mm
Engine type	SOHC, In-line 2 cylinders
Displacement	212 cm ³
Fuel induction system	1 carburetor
