

Embrace your freedom

How big do you like your adventures? The WR125R puts you in charge. Whether it's just a short blast on your local trails or an epic journey into the wild, the WR125R's genuine off-road pedigree, torque-rich engine, excellent fuel economy and agile handling enable you to decide just how big you want your adventure to be.

Built to excel in any environment, the WR125R is just at home in the city as it is on the trails. Featuring excellent throttle response, great feel from the chassis and suspension, well-balanced brakes with front ABS, multi-function LCD instrumentation linking with the free MyRide app and all-round effortless rideability, the WR125R makes navigating urban environments fun.

- Genuine dual-sport ability
- Torque-rich 125cc engine with VVA
- Multi-function LCD instrumentation
- Disc brakes with front ABS
- Excellent fuel efficiency
- Highly flexible riding position
- Go-anywhere tyres
- Low maintenance even off-road
- Chassis for adventure
- Modern design meets tradition

When you want to escape the city, ruling the trails is easy with the WR125R's supple suspension and agile chassis, working in unison with the adventure-ready 21-inch front and 18-inch rear wheel setup. Add to that the highly flexible riding position, and you get comfortable and enjoyable journeys on any terrain.

Rule the Trails

Wherever you ride, the WR125R's thrilling performance, agile handling and low running costs crank up the fun factor, open new opportunities and make every ride a journey to remember. From carving through the city to disappearing into the wild on a weekend escape, the WR125R's got you covered.

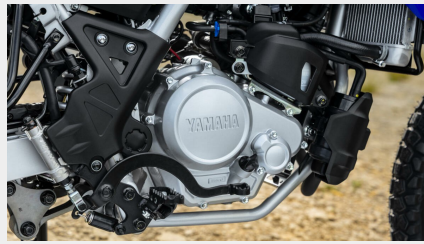

Power is freedom, and thanks to Variable Valve Actuation (VVA) the 125cc engine punches well above its weight. The WR125R offers ample torque at low- to mid-range rpm, and maximises power at high revs. Its excellent ride character and VVA-assisted power delivery make every ride thrilling yet easy-to-manage, so you can enjoy the environment and the people you are with.

You can have a great time on the WR125R in the city, but if you want to explore the unknown, the supple suspension and agile chassis combined with the 21-inch front and 18-inch rear wheel enable you to hit more challenging terrain beyond the city limits with control and confidence. And if you want to make your adventure longer, the high fuel efficiency ensures you can enjoy the ride with no interruptions.

Genuine dual-sport ability

The WR125R is a highly comfortable and enjoyable everyday ride with genuine dual-sport ability to enable you to find adventures on any terrain. The torquey engine, agile chassis and proven off-road engineering behind its striking but simple design make it the perfect machine for you to explore new horizons inside or outside the city.

Torque-rich 125cc engine with VVA

The 125cc liquid-cooled, SOHC, 4-valve, fuel-injected engine offers you thrilling yet easy-to-manage performance. Variable Valve Actuation (VVA) provides excellent ride character and impressive performance across the rev range both on- and off-road. The engine also fights emissions with two catalysers, an O2 sensor and an evaporative system, all of which help make it compliant with the latest EU5+ regulations.

Multi-function LCD instrumentation

The instrument panel is compact, with easy access to key information. You can also link it to your smartphone via the free MyRide app to display information such as incoming phone calls, messages and remaining battery level.

Disc brakes with front ABS

Highly controllable and well-balanced braking power is available both on- and off-road, thanks to a two-pot brake calliper biting into a 267mm disc at the front, and a 220mm disc with a one-pot calliper at the rear. The front brake features single-channel ABS delivering confident braking performance.

Excellent fuel efficiency

You can enjoy the freedom of motorcycling without interruptions even on longer adventures thanks to the combination of high fuel efficiency of over 40 km/L and the 8-litre fuel tank, resulting in a range of 320km. Note: Range and fuel efficiency depend on riding style. Mentioned values are based on WMTC mode.

Highly flexible riding position

Controlling the bike on any terrain is easy thanks to the flat seat providing a highly flexible riding position, which allows you to move freely on the bike, transferring weight to find the perfect balance. The smooth side panels allow easy transfer from standing to sitting, while wide footpegs give plenty of control.

Engine

Engine type	4-stroke; Liquid-cooled; SOHC; 4-valves; Single cylinder
Displacement	125cc
Bore x stroke	52,0 x 58,7 mm
Compression ratio	11,2 : 1
Lubrication system	Wet sump
Clutch Type	Wet; Multiple Disc
Ignition system	TCI
Starter system	Electric
Transmission system	Constant Mesh; 6-speed
Final transmission	Chain
Carburettor	Electronic Fuel Injection
Maximum power	10,7 kW (14,5 PS) @ 10.000 rpm
Maximum Torque	11,3 Nm (1,2 kgf-m) @ 6.500 rpm
Fuel consumption	2,3 L/100 km
CO2 emission	55 g/km

Chassis

Frame	Semi double cradle
Front suspension system	Upside-down telescopic fork, Ø 41 mm
Front travel	215 mm
Rear suspension system	link suspension; Swingarm
Rear Travel	187 mm
Front brake	Hydraulic single disc, Ø 267 mm
Rear brake	Hydraulic single disc, Ø 220 mm
Front tyre	2.75-21 45P Tube type
Rear tyre	4.10-18 59P Tube type
Caster Angle	28°20'
Trail	117 mm

Dimensions

Overall length	2.160 mm
Overall width	840 mm
Overall height	1.195 mm
Seat height	875 mm
Wheel base	1.430 mm
Minimum ground clearance	240 mm
Wet weight (including full oil and fuel tank)	138 kg
Fuel tank capacity	8,1 L
Oil tank capacity	1,1 L

Screen & Connectivity

Screen type	LCD
On-screen Navigation	Not available
Smartphone Connectivity	MyRide

WR125R
